to start the first thing we will do is

and then we cut this part with the help

now we will cut the black cover that

but be very careful not to cut the wires inside

when we have removed it we are
They usually come in two colors but
then we take a coaxial cable or a television
until the silver cover that the cable has

Take advantage now and tell me from which
to send you a special greeting in the next video
when finished, that's how it should stay
then we take the charger and wind one of its wires on the copper that we discovered earlier
when we're finished it's just time to connect

As you can see, the television shows perfectly each of the channels that are being tested
